

MEASURING MICROSCOPES MM-SERIES

The lineup provides high accuracy and ease of use and meets a wide range of needs.

Measuring Microscopes

MM-Series

The MM-series are products Nikon is most proud of, with a variety of enhanced features such as higher measurement accuracy and coordination with data processing systems.

MM-Type
MM-400N/LV

- In addition to the easy-to-use design, an motorized vertical movement mechanism is available.
- Newly developed transmissive lighting enables to switch white and green LED light.
- Stages can be selected from 3 types for MM-400N and 6 types for MM-800N (max 300x200 mm).
- Digital image measurement is possible with the E-MAX (V3 set) measurement support system.
- Data processing unit DP-E1A which combines high functionality and ease of use is available.
- The coarse/fine movement switching lever and RESET/SEND button are near the X/Y axis handle of the stage.
- Aperture diaphragm function for transmitted illuminator is available for both MM-400N and MM-800N, supporting the measurement of cylindrical parts.
- Power consumption has been reduced by 10%*1 compared to the former MM-400/MM-800 series models. The manufacturer provides environmentally friendly products and complies with the RoHS Directive and other laws and regulations*2.

*1. Calculated based on Nikon evaluation values *2. Based on Nikon standards, in consideration of domestic and foreign laws and regulations

MM-800N/U

Function Icons

- FA Focusing Aid**
The Focusing Aid (FA) ensures accurate Z-axis focusing.
- UFA Universal Epi-illuminator Focusing Aid**
A universal epi-illuminator with Focusing Aid (FA) mechanism.
- Variable Magnification**
Two objective lenses can be attached, making magnification changeover easy.
- Z-axis Motorized Motion**
A dedicated controller provides easy and accurate up/down movements.
- 2 Dual Side Coarse/Fine Focus Knob**
Coarse/fine focus knobs are on both sides.
- L Built-in Z-axis Linear Scale**
Z-axis reading is possible for non-contact height measurement.
- T Trinocular Optical Head**
Ideal for configuration with photomicrography equipment.
- M Monocular Optical Head**
For applications where cost performance is priority.
- U-EPI Universal Epi-illuminator**
Supports a wide range of applications.
- LED LED Illuminator**
A high-intensity white LED illuminator for brightfield use.

MM TYPE

Highly accurate measurement is achieved with proven optical technology and control functions.

Improved lighting performance for wide range of needs

LED Illuminator

The newly developed diascope LED illuminator has now both white and green light sources, and the operator can easily switch the light without inserting or removing filters. The high-intensity white LED lighting has a constant color temperature and the light modulator responds quickly, so efficient high-precision measurement is possible. Furthermore, it has low power consumption and long life.

LED transmissive illuminator LED reflective illuminator

8-segment LED Ring Light CYN-E1 (option for MM-type)

- Highlights the edges of samples that are difficult to see under normal lighting, such as plastic molded products.
- Selectable 8-segment ON/OFF LED with a large amount of light and a 30° angle of incidence.
- Compatible with 1x, 3x, 5x, and 10x measuring microscope objective lenses

Lighting from left side 360° lighting Lighting from right side

8-segment LED Ring Light CYN-E1

Improved accuracy/repeatability of height measurements

Focusing Aid (FA)

A newly developed split-prism-type FA with a clear pattern makes it possible to accurately focus in the Z-axis and reduces height measurement errors caused by the depth of field of the objective lens. There are two types of patterns, light and dark, and it is possible to switch between them according to the surface properties of the test object.

UNIVERSAL TYPE

Enhanced the accuracy of height measurements and a variety of illuminators make possible both an expanded observation area and high-precision measurement

Lineup of a variety of illuminators

- **Universal Reflective Illuminator LV-UEPI2**
Optimal illumination conditions can be linked to the field of view aperture, aperture diaphragm, and shutter.
- **Universal Reflective Illuminator LV-UEPI**
Automatically opens the field of view aperture and aperture diaphragm when switching between brightfield and darkfield.
- **FA Reflective Illuminator LV-UEPI FA**
Has the FA for more precise height measurement.

FA Reflective Illuminator LV-UEPI FA

Brightfield Semiconductors (IC wafers) **Darkfield** Semiconductors (IC wafers) **Episcopic DIC** Substrate

MM Series High-Precision Type

Nikon offers High-Precision Type measuring microscopes for customers who need higher precision. High-Precision Type is calibrated by a certified engineer for customer site.

Combination precision (example)

Accuracy (with MM main body)

2.0 + L/50 μm (High-Precision Type)*
2.5 + L/50 μm (Standard Type; calibration data included)*

Stage

MHS 12x8C, MHS 10x6B, MHS 8x6B, MHS 6x4B, MHS 4x4B, MHS 2x2B

To ensure accuracy, both types require a temperature controlled room. *Please contact Nikon for details regarding High-Precision Type.

Rotating Tables

Rotating Table Type 4

For PS 12x8C*, PS 10x6B, PS 8x6B

*When using rotating table type 4, stage stroke is limited for X and Y axis.

Rotating Table Type 3

For PS 6x4B, PS 4x4B

Rotating table specifications

Table	Table size(mm)	Glass insert size (mm)	Rotation range	Tool installation screw hole	Weight (kg)
Type 4	ø282	ø262	360° (uncalibrated)	6-M6 depth 9	Approx. 8
Type 3	ø204	ø165	360° (uncalibrated)	6-M6 depth 10	Approx. 5

Tilting Center Fixture A

Used to hold machined samples for PS 2x2B, Rotating Table Type 3.

Max. sample diameter and length when held level (mm)	Center height (mm)	Tilting angle	Weight (kg)
ø68×120	45	10°(in 1° increment)	Approx. 2.2

Large Stage Adjustment Knob

Enables fine adjustment of swivel plate rotation for PS 12x8C, PS 10x6B and PS 8x6B.

ACCESSORIES

Objectives 1x, 3x, 5x, 10x, 20x, 50x, 100x

These compact objectives feature long working distance and excellent resolution. Almost all have the same parfocal distances and come with lens adapters for quick and easy replacement.

- 3x objective is included with the measuring microscope.
- For installation on the optical head, an objective lens adapter is required. (excluding variable magnification optical head)

These objective lenses use eco-friendly glass that does not contain lead, arsenic, or toxic substances, making them meet the environmental needs of the times.

Magnification	1x	3x	5x	10x	20x	50x	100x
WD (mm)	79	75	64	48	20	15	4
NA	0.03	0.09	0.13	0.2	0.4	0.55	0.75

Illuminators

8-Segment LED Ring Light

Enables illumination from eight directions.

- Can be used with E-MAX RS-232C cable comes standard
- E-BUS cable is required to control with E-MAX

*Ring illuminator adapter is required for installation.

• Substrate

Reflective lighting

8-Segment LED ring light

• Rubber goods

Reflective lighting

8-Segment LED ring light

• Substrate

Transmissive lighting

8-Segment LED ring light (360°)

Fiber-optics Illuminator Set

Offers easily adjustable brightness. The ring fiber illuminator minimizes shadows caused by any unevenness on the sample surface. The bifurcated fiber enables illumination from two directions.

- Cannot be used with metallurgical microscope objectives
- Cannot be mounted when using 20x, 50x and 100x measuring microscope objectives

LED Ring Illuminator

Ideal for use in a production environment as LEDs have long product life. Uses white LEDs with a variable intensity control and constant color temperature.

- Cannot be used with metallurgical microscope objectives
- Cannot be mounted when 20x, 50x and 100x measuring microscope objectives are used

Protractor Eyepieces (for MM Type only)

Note: Monocular adapter is required when using these eyepieces with trinocular tubes

Digital Protractor Eyepiece*

Rotate crosshairs in the viewfield to measure angles.

Display unit: 1 minute, 10 minutes

*Not available for S and SL models

1-Minute Reading Eyepiece

Viewfield includes crosshairs and 60° lines. Angle indexes are read by appropriate microscopes.

Measuring range: 360°

10-Minute Reading Eyepiece

Viewfield includes crosshairs and angle indexes. When the knurled ring at the lower section of the eyepiece tube is turned, the crosshairs and the vernier both rotate 180°.

Direct C-mount Adapter

Used to install C-mount camera on the measuring microscope.

- LV-TV tube is required

ACCESSORIES

The use of the CFI60-2 series of high-performance objective lenses is possible, further improving optical performance

The TU Plan Fluor series of standard objective lenses with both excellent chromatic aberration correction and long working distances

This is a universal-type standard objective lens that make possible all observation methods with a single objective lens: brightfield, darkfield, simple polarization, differential interference, and epifluorescence using not only the visible region but also the UV region.

This new optical system combines excellent chromatic aberration correction and long working distances. The edge detection for the location being measured and operability have been improved, and a wider variety of samples can be handled.

Type	Magnification	NA	W.D.(mm)	Glass thickness correction range (mm)
CFI L Plan EPI CR	20x	0.45	10.9-10.0	0-1.2
CFI L Plan EPI CR	50x	0.7	3.9-3.0	0-1.2
CFI L Plan EPI CRA	100x	0.85	1.2-0.85	0-0.7
CFI L Plan EPI CRB	100x	0.85	1.3-0.95	0.6-1.3

Environmental Considerations

The TU Plan Fluor and CFI L Plan EPI CR series use eco-friendly glass that does not contain lead, arsenic, or toxic substances, making them meet the environmental needs of the times.

The CFI L Plan EPI CR series with correction rings

No correction for cover glass thickness (with 50x objective lens)

Corrected for cover glass thickness of 0.7 mm (with 50x objective lens)

Tilting trinocular eyepiece tube

Tilting trinocular eyepiece tube

The LV-TT2 tilting trinocular eyepiece tube with built-in reticle offers comfort to all users, regardless of their viewing positions. The optical path changeover of 100:0/20:80 allows simultaneous use of a monitor.

Light source

In addition to a halogen lamp, a compact LED EPI lamphouse for brightfield, darkfield, and DIC observations is available.

Manual nosepieces

A variety of manual control nosepieces are available to suit all needs.

	Brightfield	Darkfield	DIC
C-N6	○	—	—
L-NBD5	○	○	—
L-NU5	○	○	○

○ : Supported — : Not supported

Templates

The following dedicated templates are available to facilitate profile comparison and measurements. Templates are designed for 3x objectives.

- Standard angle templates (standard)
- Concentric (diameter 0.2-4.6)*

*Cannot be attached to monocular type

Standard

Concentric

DP-E1A

Data Processor with improved accuracy and ease of use

Effectively used in combination with a measuring microscope/profile projector, the DP-E1A quickly calculates geometrical features with simple and interactive operations. Measurement results are automatically memorized as teaching steps and can be easily used as a measurement routine.

Simple & interactive operation

Feature Oriented Operation allows the user to conduct measurements by following the graphics, providing a seamless measuring environment. Measurement results are automatically memorized as teaching steps and can be easily used as a measurement routine.

GD&T compliance

Geometric Dimensioning & Tolerancing defined by the ANSI Y 14.5M Specification is supported. In addition to Location Tolerancing such as True Position, MMC and LMC, determination of Form, Orientation and Runout can be conducted interactively.

Multi-language support

English, German, Japanese and various other Asian and European languages are supported.

ACCESSORIES

E-Max Series

FOV Measurement with advanced digital image processing technology

Combined with the V3 digital camera, E-MAX series software provides various advanced measurements and processing functions, ranging from 2D data processing and image measurement, to data storage. Automated edge detection with sub-pixel processing enables more precise and repeatable measurement.

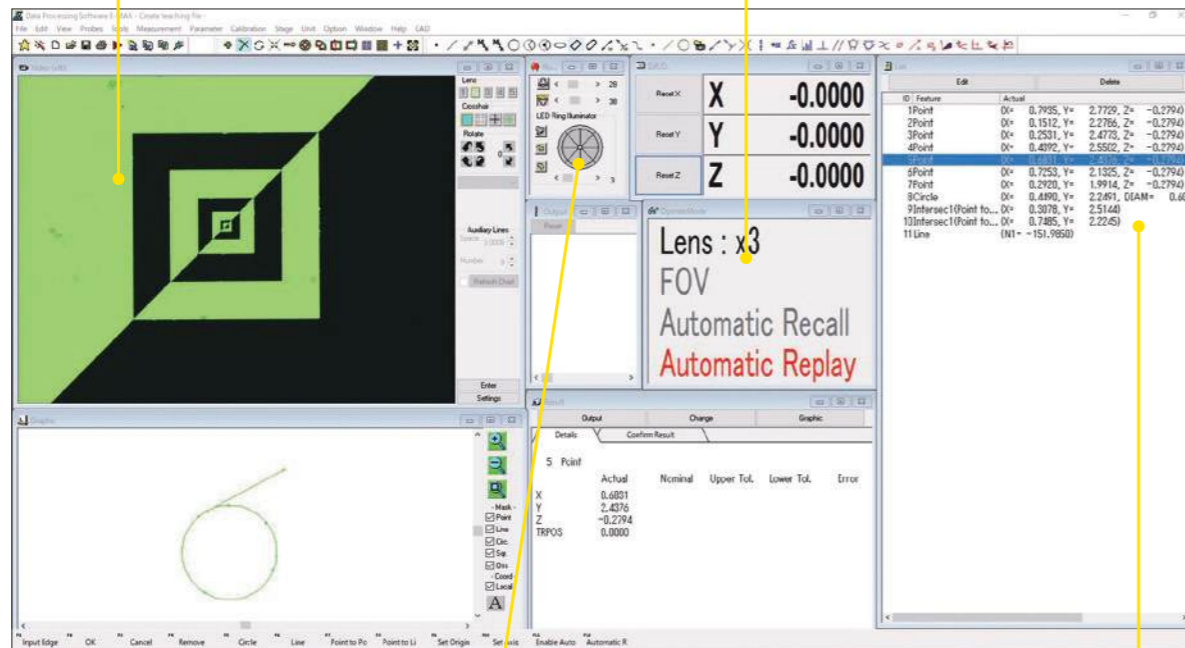

E-MAX V3 set

High-resolution digital images

High-resolution image measurement is possible with the combination of a digital camera and a measuring microscope. Images displayed in the video window can be saved in BMP or JPEG format.

Automated edge detection and automatic replay functions

Simply moving the stage to the navigated measurement area enables automatic in-screen measurement during replay. In addition, edge detection is done by automatically correcting the position of the stored image, greatly reducing measurement time and cost.

E-MAX screen

Automatic Light Adjustment

Saves the lighting conditions at the time of teaching for each point input, and reproduces them accurately on replay.

One-click output to Excel

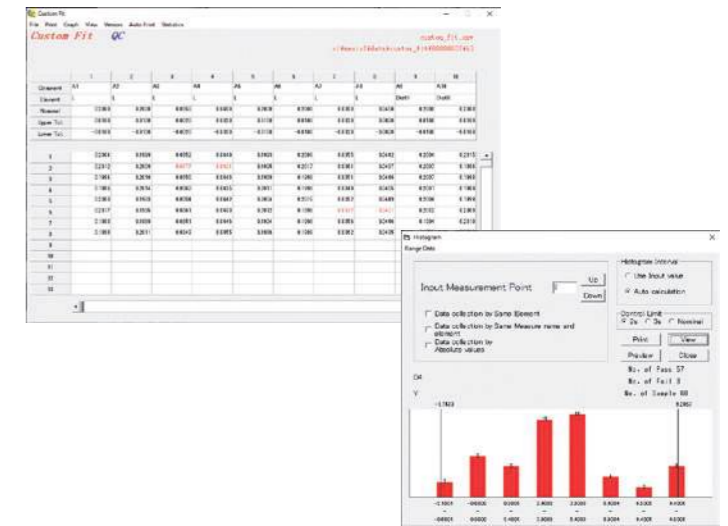

Measurement results can be displayed in Excel in real time. Even during manual measurements, measurement result files can be saved and Excel can be launched from E-MAX for speedy work.

Application Software for Measurement Support/Data Processing System

Custom Fit QC: Report and chart generating

Suitable for lot control of inspection data such as maximum value, minimum value, range, standard deviation, and process capability index.

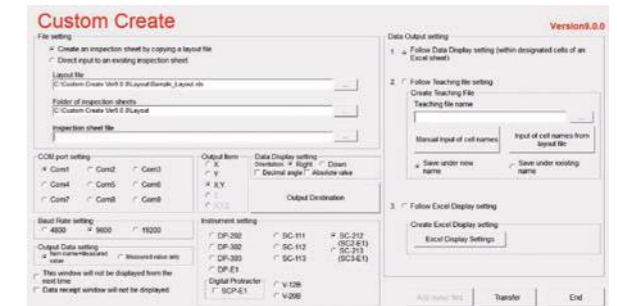

- Customization of inspection result sheets are possible, in addition to the 10 standard sheets
- BMP and JPEG files can be pasted onto the inspection result sheets
- Graphs can be automatically generated
- Displays are adjustable between degree/minute/second
- Easy to generate histograms, X-R control charts, and scatter diagrams

Custom Create: Direct link to Excel worksheets

Measurement data from counters and/or data processors can be transferred directly to Excel sheets. Multiple worksheets can be transferred at once, achieving efficient measurements.

- Compatible measuring instruments: MM-400N/800N series, DP-E1A, V-20B, V-12B
- Allows data transfer to customized inspection-result sheet forms
- 3 standard inspection result sheets are available

Operating environment:

- Windows®7 or Windows®10
- Microsoft Excel® 2003 or later
- Required memory: 512MB (min)
- Codevelopment: Aria Co., Ltd.

ACCESSORIES

Counters

3-Axis/2-Axis Counters

The display unit can be mounted on either side of the main body. Counters can be connected with data processors and digital printers via the RS-232C port.

3-axis counter

2-axis counter

XY Reset Switch

Can be attached to the main body to easily reset values while using the stage.

X/Y-axis

Counter Remote Switch

Enables remote control of the counter's RESET and SEND.

Digital Thermal Printer TSP743II

Connect to the MM-400N/800N control box to print out values from the counter.

TSP743II

Foot Switch

Used to send load command to DP-E1A. Frees both hands to enhance measurement efficiency.

Calibration Scale 300 mm

Used to calibrate feeding accuracy of stage up to 300 mm. The scale is made of low expansion glass to minimize thermal error. Both 10 mm-interval sensor patterns and calibrations are provided.

Accuracy: Within 1 μm against compensation values.

Vibration Isolation Table

Provides a stable, even surface by reducing floor vibrations. Compatible with measuring microscopes, data processing systems, external light modulators, and computers.

LED Episcopic & Diascopic Illuminator is a Class 1 LED Product

CLASS 1 LED PRODUCT

8-segment LED Ring Light is a Class 2 LED Product

**CAUTION – CLASS 2 LED RADIATION
DO NOT STARE INTO THE BEAM**

ISO/IEC 17025 Certified

Nikon Corporation Industrial Solutions Business Unit is certified as an ISO/IEC 17025 accredited calibration laboratory for measuring microscopes and measuring projectors (profile projectors) by the Japan Accreditation Board for Conformity Assessment.

(ISO/IEC 17025: International standard, which specifies the general requirements to ensure that a laboratory is competent to carry out specific tests and/or calibrations)

Date of Initial accreditation:	September 8, 2006
Scope of accreditation:	Measuring microscopes
Accredited section:	Industrial Solutions Business Unit
Calibration site:	Customer's laboratory (field service)
Expanded Uncertainty:	X/Y-axis indication accuracy of measuring microscopes Linear scale up to 300 mm: $(0.70 + 5.0 \times 10^{-3} \times L) \mu\text{m}$

Specifications and equipment are subject to change without any notice or obligation on the part of the manufacturer. September 2024 ©2006-2024 NIKON CORPORATION
